

the Master Course

{C0DENATION}

JS & DOM

KeyCode Challenge

{ CØDENATION }

KeyCode Generator

These criteria **must be met**:

- > A welcome message should be displayed (in any form)
- > The generator should wait for a key to be pressed
- > Once the key has been pressed, the generator should report the:
.code, .key & .charCode values
- > Appropriate styling should be applied

Stretch Goals

These criteria **are optional**:

> When viewing on a phone an input box is shown and used so a user can get the key code information on mobile and desktop machines

DOM

Example
